

WORKER GUIDE

LoveTap.Me

For workers — activate your LoveTap, connect Square, add your socials, and track your tips.

Your LoveTap pendant lets customers tip you by tapping their phone — no cash. You set up and manage everything on the web at **app.lovetap.me**. No app to install.

1 · Activate your LoveTap

- 1 Tap your new pendant with your phone — it opens `app.lovetap.me/t/LT-XXXXXX`.
- 2 It shows **Activate this LoveTap**. Tap **Activate & create account**.
- 3 Sign up (or log in if you already have an account). Your chip code is carried through automatically.
- 4 Confirm **Add this LoveTap to your account** — it's now yours.

No NFC? Go to **app.lovetap.me/portal**, sign in, and add the code (printed in the packaging) with **+ Add**.

2 · Connect Square (required to get paid)

- 1 In your portal, tap **Connect Square** and log into your own Square account.
- 2 Authorize LoveTap to process payments for you. Status then shows **Connected**.
- 3 **Finish your Square activation** — verify your identity and link your bank. Until Square activates your account for card payments, tips can't be received and Apple Pay / Google Pay won't appear.

No tips can be received until Square is connected AND fully activated. Tips settle into your own Square account; Square deposits them to your bank on its schedule (usually 1–2 business days). LoveTap never holds your money.

3 · Add your social links

- In **Profile**, add any combination of **TikTok**, **Instagram**, **Facebook**, or **X** (handle or full link).
- After a customer tips you, a **“Follow me”** section appears on their receipt with buttons to your pages.
- Leave any you don't use blank — only the ones you fill in are shown.

4 · Your portal (app.lovetap.me/portal)

- **My LoveTaps** — every pendant on your account and its status; **+ Add** to claim another.
- **Dashboard** — total tips and how many you've received (paid tips only).
- **Activity** — your full tip history.
- **Profile** — edit your details and social links, change password, manage Square, log out.

5 · Good to know

- You receive the **full tip** — the customer covers the small service fee.
- Customers can pay by **card**, **Google Pay**, or **Apple Pay** — whichever their phone supports.
- One account can hold **multiple LoveTaps** — just tap each new one and confirm.
- Your chip code never changes and can't be reused by anyone else.
