

WORKER GUIDE

LoveTap.Me

For workers — activate your LoveTap, connect Square, and track your tips.

Your LoveTap pendant lets customers tip you by tapping their phone — no cash. You set up and manage everything on the web at **app.lovetape.me**. No app to install.

1 · Activate your LoveTap

- 1 Tap your new pendant with your phone — it opens `app.lovetape.me/t/LT-XXXXXX`.
- 2 It shows **Activate this LoveTap**. Tap **Activate & create account**.
- 3 Sign up (or log in if you already have an account). Your chip code is carried through automatically.
- 4 Confirm **Add this LoveTap to your account** — it's now yours.

No NFC? You can also go to **app.lovetape.me/portal**, sign in, and add the code (printed in the packaging) with **+** **Add**.

2 · Connect Square (required to get paid)

- 1 In your portal, tap **Connect Square** and log into your own Square account.
- 2 Authorize LoveTap to process payments for you. Status then shows **Connected**.
- 3 You can **Reconnect** or **Disconnect** anytime under Profile.

No tips can be received until Square is connected. Tips settle into your own Square account; Square deposits them to your bank on its schedule. LoveTap never holds your money.

3 · Your portal (**app.lovetape.me/portal**)

- **My LoveTaps** — every pendant on your account and its status; **+** **Add** to claim another.
- **Dashboard** — total tips and how many you've received.
- **Activity** — your full tip history.
- **Profile** — edit your name, email, phone; change password; manage Square; log out.

4 · Good to know

- You receive the **full tip** — the customer covers the small service fee.
- One account can hold **multiple LoveTaps** — just tap each new one and confirm.
- Your chip code never changes and can't be reused by anyone else.
