

TAP TO TIP

LoveTap.Me

What a customer does to leave a tip — no app, no account.

Every LoveTap pendant opens a web page when tapped. The customer pays right there in their phone browser — by card or a digital wallet.

The flow

- 1 Tap the pendant → the browser opens `app.lovetape.me/t/LT-XXXXXX`.
- 2 The worker's name is shown, so you know who you're tipping.
- 3 Pick **\$5 / \$10 / \$20 / \$50** or enter a custom amount.
- 4 Review the breakdown: **Tip + service fee = Total**. The fee is paid by you, so the worker receives the full tip.
- 5 Pay with **Google Pay**, **Apple Pay**, or by **card** on Square's secure form.
- 6 See **Thank you** with a receipt — and buttons to **follow the worker** on social media if they've added them.

Paying with a digital wallet

- **Google Pay** — appears in Chrome / on Android with a saved card.
- **Apple Pay** — appears in Safari on iPhone, iPad, or Mac.
- No wallet? Just enter your card details — that always works.

Card details go straight to Square — LoveTap never sees or stores them. For a refund, contact the recipient or LoveTap support with the reference on your receipt.

If something's missing

- Google Pay only shows in Chrome/Android; Apple Pay only in Safari on Apple devices. Other browsers just show the card form.
- “Not currently accepting tips” means the worker hasn't finished their Square setup yet.
- Follow buttons only appear for the platforms the worker chose to share.
