

LoveTap.Me

For workers who receive tips — set up and manage from any phone browser.

Everything is done on the web at **app.lovetap.me** — no app to install. Your LoveTap pendant carries a permanent link; tapping it opens your setup or tip page automatically.

1 · Activate your LoveTap

- 1 Tap your new LoveTap with your phone — it opens `app.lovetap.me/t/LT-XXXXXX`.
- 2 You'll see **Activate this LoveTap** with your code.
- 3 Tap **Activate & create account**, enter your name, email, mobile and a password (already have an account? Log in instead — the code is carried through).
- 4 Confirm **Add this LoveTap to your account**. It's now yours.

Your code is permanent and unique to that pendant. You never generate or change it — it's pre-loaded, and tapping carries it through automatically.

2 · Connect Square (required to get paid)

- 1 In your account, tap **Connect Square** and authorize LoveTap.
- 2 Status shows **Connected**. You can **Reconnect** or **Disconnect** anytime (disconnecting stops tips immediately).

No tips can be received until Square is connected. Tips settle into your own Square account, and Square deposits to your bank on its own schedule — LoveTap never holds your money.

3 · Manage your account

- **My LoveTaps** — all your pendants and their status. Add another anytime by tapping it or entering its code.
- **Dashboard & Transactions** — your tips and history.
- **Square payouts** — sent / paid / failed transfers, from Square.
- **Profile** — your details and password.

How a customer tips you

- They tap your pendant — your tip page opens in their browser (no app, no account).
- They pick an amount, see the total, and pay by card via Square.
- The fee is added on top, so **you receive the full tip**.
